RE: PROSTATE SUPPORT

Dear Sir / Madam:

This is a 30-day notification of a statement of nutritional support for a dietary supplement. The product name is **Andrew Lessman's Prostate Support**. The structure / function claims on all sizes and configurations of this product are identical. They are as follows:

Several clinical studies have demonstrated that Saw Palmetto is beneficial in supporting the normal functioning of the prostate gland, and our **Prostate Support** provides the recommended daily levels (320 milligrams) in a single capsule. As in the most reliable medical research studies, our high potency extract of the Saw Palmetto berry is standardized to deliver 85-95% total fatty acids. We also include 3 milligrams of the powerful anti-oxidant Lycopene, since it is the most abundant and concentrated anti-oxidant carotenoid present in the prostate gland. Preliminary research has suggested that Lycopene's anti-oxidant benefits help protect the prostate from oxidative free radicals and provide support for normal prostate function. We then add Pumpkin Seed Oil to help optimize these ingredients' benefits. Pumpkin seeds have been used historically to provide nourishing support to the prostate.

Respectfully Submitted,

Dr Nancy Steely, ND
Director of Research
